## Sebco:

*Smart, safe and secure*

---

Fuelchief Ltd is the manufacturer the Sebco Range of fuel storage systems. Based in Christchurch, Sebco products have been leading the way in innovation for quality fuel storage and dispensing for the farming and industrial markets all over New Zealand since 2007. We specialise in products for the storage and dispensing of diesel, DEF fluids (AdBlue) and waste oil. Sebco products are proudly New Zealand made.

Our products are designed to provide users with fuel storage facilities that are smart, safe, secure and compliant. In a world where environmental protection, workplace safety and efficiency, security, compliance, record management and fuel sterility are priorities, Sebco products tick all the boxes. Sebco products have various options that will meet all types of market needs.

## Mission Statement:

---

Our mission is to offer and supply Sebco products that give 100% satisfaction to all owners and operators, fully meeting their needs. We will ensure customers get the right advice and the right products at all times.

***“ Our vision is to constantly be the market leaders and innovators for fuel storage systems in New Zealand, offering quality products that continue to meet and exceed the requirements of the owners and operators. We strive to offer the best possible products and the best possible service to ensure the customer’s experience is second to none.”***

# *Fluid Management Systems*

**Piusi:***Diesel dispensing pumps*

**Piusi pumps provide fast, efficient and reliable diesel dispensing. Various options available including full user information systems which track individual user consumption.**

Multi-user control panel with accessories for PC interaction. MC controls: pump start up, identification of authorised users, pre-selection of dispensed quantity, management of pulse meter, management of an external switch to switch off pump at minimal level, management of micro switch connected to nozzle holster, connection to an external printer.

**Piusi Pumps Benefits:**

- Panel with dual display, keyboard and i-button reader
- Controls up to 120 users through passwords or i-button keys
- Calculates consumption of each individual user
- Dedicated software for printing individual detailed summaries
- Key reader with USB socket for exporting data

**Everlink:***Fuel management system*

**A fuel management system for your business that automatically records fuel use, all information is stored online so it can be accessed centrally for multiple sites.**

This is an excellent business tool that enables precise, up to date accounting and records, enabling accurate fuel monitoring.

The Everlink Micro HV (mains) removes human error and hand written log sheets, making control and tracking easy.

Everlink Micro allows full control from your office of who can access fuel for what vehicle or plant, and how much they can take.

**Everlink Benefits:**

- Fuel records are automatically stored online as fuel is used
- A simple online interface provides fuel use insights
- Reconciliation is easy, and takes minutes even for multiple sites
- Easy and accurate claims for fuel rebates
- Total control over tracking fuel use
- Easy to see poor efficiency in vehicles and fleets
- Centralise fuel records and accounts across multiple sites
- Simple to allocate costs for each department

**Sapphire:***Fuel management terminal*

**The Sapphire Lite is a fuel management system that provides cost effective control over your fuel with vehicle/driver and stock reporting.**

Track every litre of fuel or fluid dispensed with the Sapphire Lite terminal, the next generation of entry level fuel management terminals, utilising contactless technology for secure and controlled fuelling. The MCS website that connects to the unit, is a money saving business tool providing user friendly reporting and reconciliation.

**Sapphire Lite Benefits:**

- Ideal for unattended refuelling sites
- Works with all pump types
- Range of authorisation options available
- Offers a total wireless solution
- Allows you to manage your fuel 24 hours a day, 7 days a week
