leading, versatile, 24/7
Fuel Management System

- Ideal for Unattended Refuelling sites

- Works with all major protocols

- Accepts local account cards

- Range of authorisation options

- Offers a total wireless solution

- Connect to CompacOnline or use USB FMS
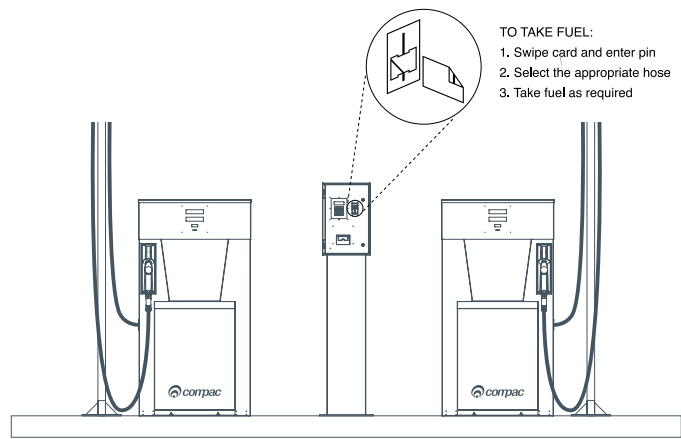

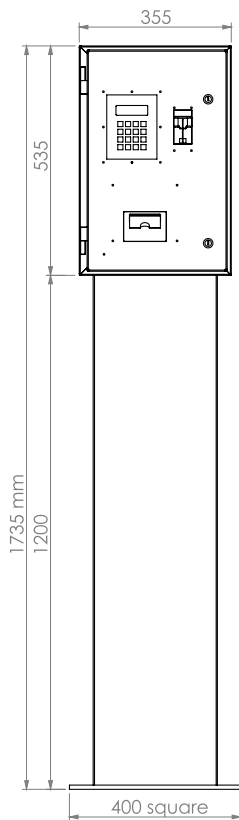

compac
INTEGRATED REFUELLING SOLUTIONS

The Compac DCA is a fuel management terminal ideal for unattended refuelling and payment.

The DCA is particularly suited to sites such as airfields, marinas or after hours retail service stations.

The DCA accepts a variety of devices to authorise fuel deliveries for approved users. Using different authorisation methods, user identification at the DCA can be configured to match with the driver or vehicle. In addition, odometer readings can be recorded at the time of refuelling with a PinPad prompt.

For downloading fuel delivery data from the DCA there are two options: CompacOnline or USB data transfer. Both methods allow you to: manage account cards, adjust pump pricing (remotely with CompacOnline), manage transactions and run reports.

Specifications

Model	CompacOnline DCA	USB DCA
No. of Pumps	1 - 16	1 - 16
